To: The Selection Committee
Owner: HCA Healthcare
Project Title: Good Samaritan Replacement Hospital

Subject: **Professional Reference for William Koenig/WMK Consulting Inc. Inspector of Record**

Dear Members of the Selection Committee,

I am writing to highly recommend William M Koenig and his firm for the Inspector of Record position on your upcoming Good Samaritan Replacement Hospital, HCAI Level 1, Acute Care project. As a Contractor at Martin Bros./ Marcowall, Inc., I worked directly with WMK Consulting on several projects, including the Riverside Tower G project from 2014 to 2017, this project involved a 7 story HCAI Level 1 Tower totaling 258,142 SF that was on an active campus and tied into existing buildings.

In my 30 years in healthcare construction, I have rarely encountered an inspector who balances rigorous code compliance with a collaborative field approach as effectively as WMK Consulting. They possess an tremendous understanding of the California Building Standards Code (Title 24) and HCAI regulations, ensuring our site was strictly compliant at every phase.

What sets WMK apart from a contractor's perspective is their proactive communication. Rather than waiting to flag deviations during a final inspection, they actively engaged with our superintendents during the layout and rough-in phases. For example, they were always wiling to review with us any issues identified as a discrepancy between the approved construction documents and field conditions. Their immediate, willingness to work together, clear documentation/communications allowed us to coordinate with the design team and resolve the issue before it impacted our critical path schedule.

WMK maintains an excellent, professional relationship with HCAI Field Support staff and hospital facility managers. They understand that hospital construction requires minimizing disruption to active patient care environments, always verifying that the infection control (ICRA) barriers and interim life safety measures were flawless.

Thanks to WMK's thoroughness, fairness, and efficient approach to inspections, all our projects that have involved WMK, have passed its final HCAI inspections smoothly and on schedule, they protect the hospital's liabilities while respecting the realities of a construction timeline

I strongly endorse William Koenig/WMK Consulting for your project. They will be a massive asset to your construction management team and will ensure your facility is delivered safely, compliantly and on time.

Please feel free to contact me at 310-977-5568 or gregh@martinbros.com if you would like to discuss our experiences further.

Sincerely,

Greg Hutson
